# No Infection

# Diagnosis of HPAI

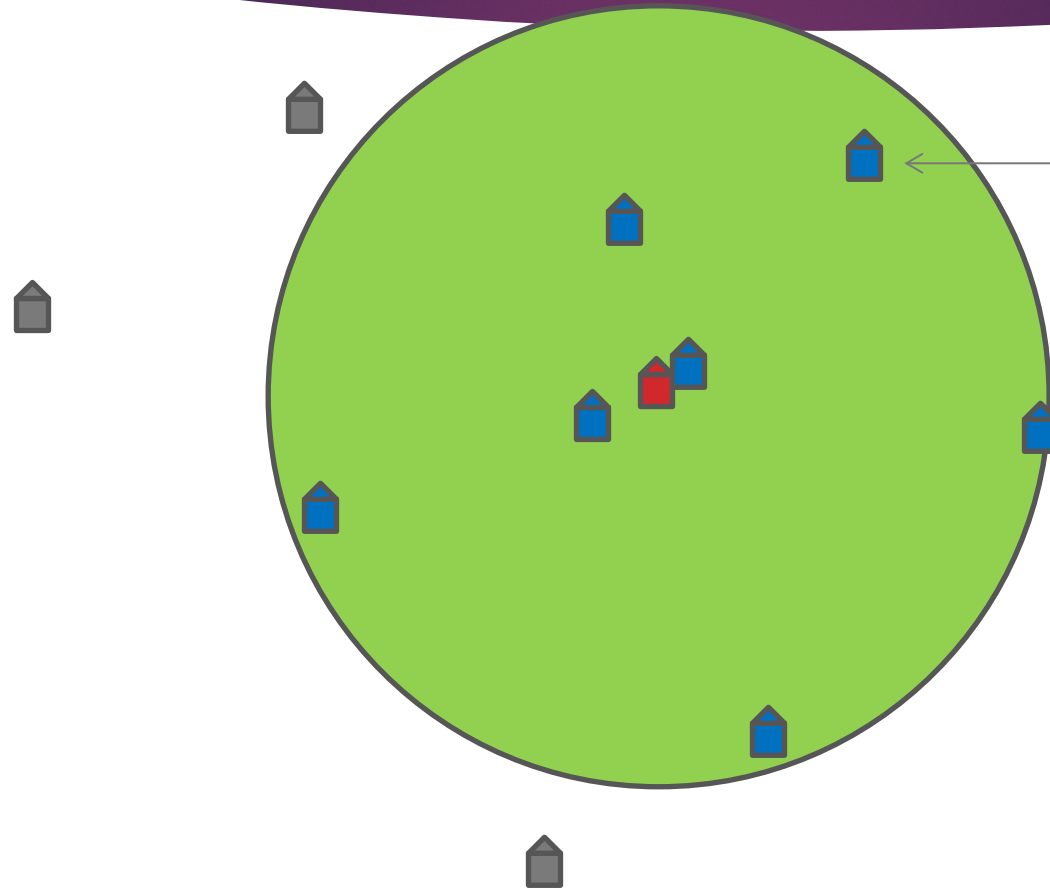

# HPAI Response – The Control Area

## **Infected Premises (IP)**

- A premises where a presumptive positive case or confirmed positive case exists based on laboratory results, compatible clinical signs, HPAI case definition, and international standards.

# At-Risk Premises in the Control Area

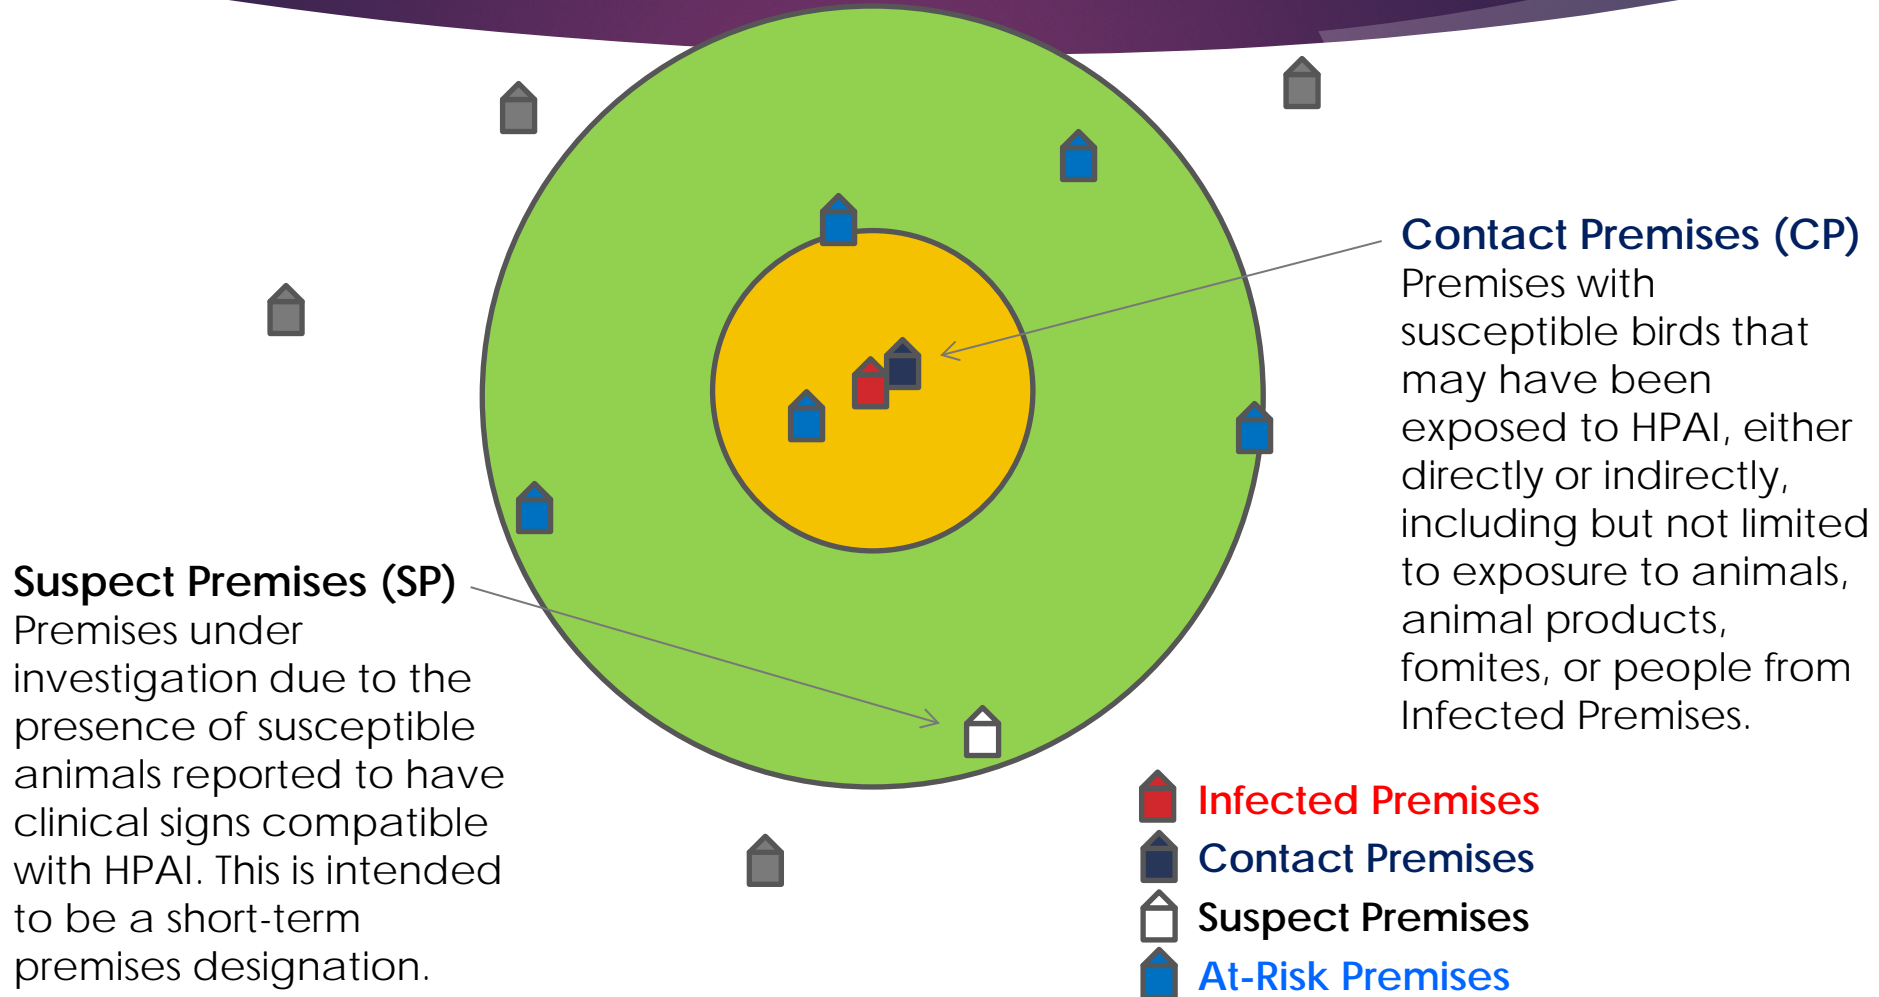

## At-Risk Premises (ARP)

- Premises that have susceptible birds, but none have HPAI clinical signs

- Objectively demonstrates that it is **not** an IP, **not** Contact Premises, **not** a Suspect Premises.
- ARPs may seek to move birds or products within the Control Area by permit.
- Only ARPs are eligible to become Monitored Premises.

# Identification of Contact and Suspect Premises

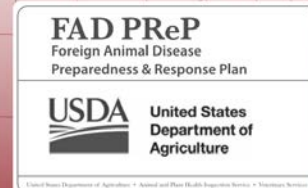

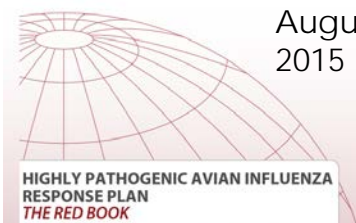

## Definitions of Premises Designations

Premises	Definition	Zone
Infected Premises (IP)	Premises where a presumptive positive case or confirmed positive case exists based on laboratory results, compatible clinical signs, HPAI case definition, and international standards.	IZ
Contact Premises (CP)	Premises with susceptible animals that may have been exposed to HPAI, either directly or indirectly, including but not limited to exposure to animals, animal products, fomites, or people from Infected Premises.	IZ, BZ
Suspect Premises (SP)	Premises under investigation due to the presence of susceptible animals reported to have clinical signs compatible with HPAI. This is intended to be a short-term premises designation.	IZ, BZ, SZ
At-Risk Premises (ARP)	Premises that have susceptible animals, but none of those susceptible animals have clinical signs compatible with HPAI. Premises objectively demonstrates that it is not an Infected Premises, Contact Premises, or Suspect Premises. At-Risk Premises may seek to move susceptible animals or products within the Control Area by permit. Only At-Risk Premises are eligible to become Monitored Premises.	IZ, BZ
Monitored Premises (MP)	Premises objectively demonstrates that it is not an Infected Premises, Contact Premises, or Suspect Premises. Only At-Risk Premises are eligible to become Monitored Premises. Monitored Premises meet a set of defined criteria in seeking to move susceptible animals or products out of the Control Area by permit.	IZ, BZ
Free Premises (FP)	Premises outside of a Control Area and not a Contact or Suspect Premises.	SZ, FA

Permanent description until depopulated and cleaned & disinfected

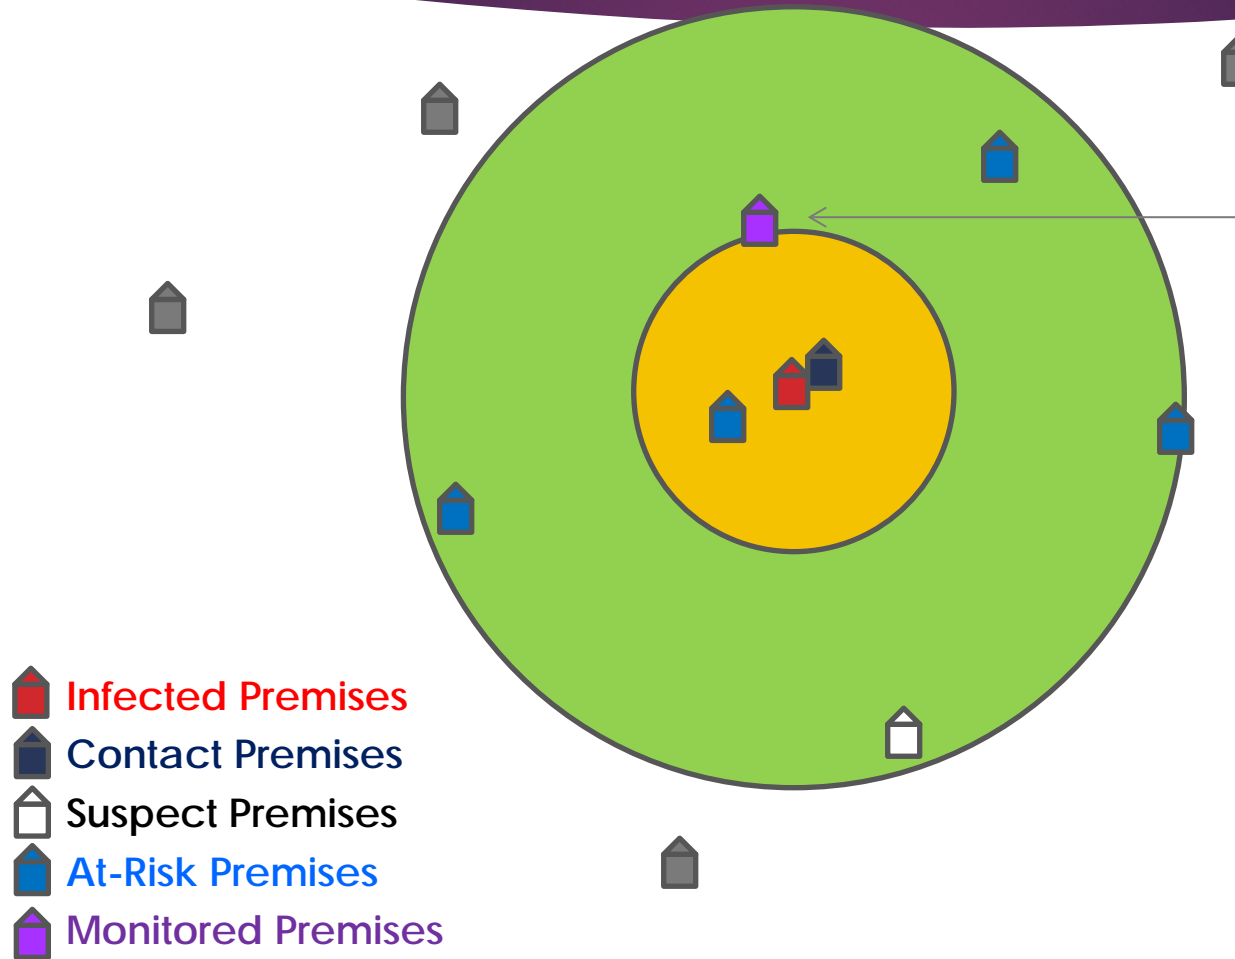

August 2015

# What are monitored premises?

- ▶ Monitored Premises (MP) meet a set of defined criteria as determined by Incident Command:
  - ▶ No clinical signs (not a suspect)
  - ▶ No epidemiological links (not a contact)
  - ▶ Biosecurity satisfactory
  - ▶ Normal production parameters (mortality and egg production for example)
  - ▶ Negative RRT-PCR tests

# Identification of Monitored Premises

## Monitored Premises (MP)

- Premises objectively demonstrates that it is **not** an Infected Premises, **not** a Contact Premises, **not** a Suspect Premises.
- Monitored Premises meet a set of defined criteria in seeking to move susceptible animals or products out of the Control Area by permit.

# Establishing the Monitored Premises

HOW DO WE GET THERE?

Establishing a Layer Flock as Monitored Premises for the Permitted Movement of Washed and Sanitized Eggs to Premises without Poultry
